DETAILED ACTION

Remarks

This Office Action fully acknowledges Applicant's remarks made on May 14th, 2007. Claims 1-9 and 22 are allowed. Claims 10-21 have been cancelled. Applicant's newly submitted drawings, marked as "Replacement Sheet" have been accepted.

Allowable Subject Matter

Claims 1-9 and 22 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or fairly suggest an apparatus or a system for measuring blood platelet contractility in which a spherical rigid chamber has a smaller, flexible membrane chamber coated on its outer surface with a suitable adhesive to prevent slippage of a clot forming on the outer surface, and placed concentrically within the rigid chamber so as to create a void space between the rigid chamber and the flexible membrane. The closest prior art of record, Carr Jr. (USPN 4,986,964), discloses a clot retractometer in which a rigid chamber is connected to a coupling arm, which connects to a pressure transducer for detecting pressure changes as the sample exerts pressure changes on the upper plate of the rigid chamber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
